PROFESSIONAL SUMMARY

Frontend developer with over a year of production experience building responsive web interfaces in Angular, TypeScript, React, and JavaScript. Converts Figma designs into clean, cross-browser HTML, CSS, and SCSS — design-token systems, reusable components, 320px–2000px responsive layouts, and REST API integration. Also works across the stack with ColdFusion (CFML), PHP, MySQL, Git, and Docker-based CI/CD deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, ColdFusion (CFML), PHP, Python, Java, HTML5, CSS3, SQL

Frameworks & Libraries: jQuery, React, Angular, Bootstrap 5, Node.js

APIs & Practices: REST APIs, ES Modules, AJAX, Responsive Web Design, Web Performance

Databases & Tools: MySQL, Git, Docker, Nginx, Figma, Jenkins, GitHub Actions

Cloud & Deployment: Oracle Cloud Infrastructure (OCI), Netlify

EXPERIENCE

Vayublu Pvt. Ltd. | Frontend Developer

Jul 2025 – Present

Hyderabad, Telangana

- Build customer-facing web interfaces for two products — the Persona Nutrition e-commerce platform (ColdFusion/JavaScript) and the VblueLINK link-management platform (Angular) — from Figma design to production release.

Persona Nutrition | ColdFusion (CFML), JavaScript, AJAX, HTML/CSS

- Implemented a new brand-wide UI design across Persona's core customer-facing pages — the main landing (index) page, product recommendations page, and checkout flow — converting Figma designs into production, mobile-responsive HTML/CSS/JavaScript.
- Developed the customer login dashboard end-to-end and integrated the REST APIs powering it.
- Built a custom server-side A/B testing framework in ColdFusion — deterministic MD5-hash 50/50 traffic split with cookie- and database-backed visitor persistence — enabling controlled experiments without a third-party SDK.

VblueLINK | Angular 20, TypeScript, SCSS

- Standardized the UI of a production link-management platform by defining an 8-color design-token system and Manrope typography scale, applying shared styling across 25+ pages spanning dashboards, link & QR analytics, QR generation, barcode studio, contact cards, bulk QR, protected images, and the public marketing site.
- Rebuilt page layouts for 320px–2000px responsive breakpoints and resolved production rendering issues involving flexbox min-content overflow, position: sticky failures caused by ancestor overflow, stacking contexts, and CSS specificity conflicts.
- Developed user-facing features in Angular and TypeScript, including a sticky global navigation with desktop hover mega-menus and mobile accordion menus, route-level SEO meta titles/descriptions for public and dynamic feature pages, and consolidated standalone link-management pages into filterable analytics views.
- Redesigned the authenticated application shell with a collapsible sidebar, mobile header actions, and account menu, while modernizing settings, subscription/billing, API client-token management, and authentication flows; added consistent loading states and page-transition animations across the dashboard.

PROJECTS

my_eshop — Multi-Tenant E-commerce Marketplace | PHP, MySQL, Docker, Nginx, React Native (Expo), REST / JWT

- Multi-tenant e-commerce platform (PHP, MySQL) with separate admin, seller, and customer roles.
- Sellers manage their own products and orders from a dashboard; customers browse, cart, and checkout with Razorpay/Authorize.Net payments.
- Includes a JWT-secured REST API, and runs on Docker with Jenkins CI/CD.

EDUCATION

VIT-AP University — B.Tech, Computer Science

2021 – 2025

Sri Chaitanya Junior College — Class XII, Hyderabad | 87%

2019 – 2021

Sri Chaitanya School — Class X, Hyderabad | CGPA: 9.0

2019

CERTIFICATIONS

- OCI 2025 Foundations Associate | Cisco JS Essentials | Infosys Springboard Angular
